Reporting Policy

This policy governs how business metrics are calculated and reported.

Fiscal year. The fiscal year runs from 1 April to 31 March. Q1 is April to June, Q2 is July to September, Q3 is October to December and Q4 is January to March.

Currency. Sales figures are reported in US dollars. Retail store figures are reported in Indian rupees and are never converted in operational dashboards.

Data refresh. Sales data refreshes nightly at 02:00 UTC. Retail data refreshes every hour. Web analytics refresh daily at 06:00 UTC.

Targets and Thresholds

Satisfaction target. At least 60 percent of retail transactions should be satisfied purchases (rated 4 or 5).

Web targets. The target conversion rate is 3.5 percent. The target bounce rate is below 55 percent. Cost per session should stay below 6 US dollars.

Margin review. Any product category whose margin rate falls below 30 percent in a quarter is escalated to the pricing committee.

Refunds. Refunds are recorded as separate negative transactions and are excluded from revenue reporting until the refund is approved.

Data Privacy

Customer emails and phone numbers are personal data. They must never be exported, shared outside the analytics team, or included in reports.

Access to customer master data is reviewed every quarter by the data protection officer.
